Professional Summary

Highly skilled and motivated software developer with experience in various programming languages, frameworks, and technologies. Proven ability to build and maintain web applications, with a focus on creating user-friendly and efficient solutions. Currently working on an Education Management System project and seeking opportunities to leverage skills in a dynamic environment. I am having some good track in cp in leetcode, hacker rank

Skills

- **Languages & Technologies:** HTML, CSS, JavaScript, TypeScript, Python, C, C++
- **Frameworks & Libraries:** Bootstrap, UI ,React , tailwind
- **Tools:** Git, GitHub
- **Database Management:** SQL
- **Development Skills:** DSA (Data Structures and Algorithms) in Java
- **Additional Skills:** Average grip on MERN stack

Projects

- **Environment-Friendly Quiz Game**
  Developed a quiz game focused on environmental awareness, incorporating interactive UI elements and user-friendly design.
- **Spotify Clone**
  Created a clone of the Spotify interface to replicate music streaming features and user interactions.
- **Netflix Clone**
  Built a Netflix-like platform to simulate streaming services, including media playback and content organization.
- **Education Management System** (Currently Working On)
  Developing a comprehensive system to manage educational institutions, including student information, course management, and reporting features.
- **Wanderland**

  A full-stack MERN application similar to Airbnb, featuring seamless API integrations for property listings, user authentication, and booking management.

Education

- **Ryan International School, Surat Adajan**
  Completed high school education with a focus on foundational programming and computer science principles.
- **Asansol Engineering College**
  Pursued a degree in [Bachelor of technology in Computer science(specialized in AIML)], focusing on advanced software development, algorithms, and system design.

Additional Information

- **Average Grip on MERN Stack & ML:** Demonstrated understanding and practical experience with MongoDB, Express.js, React, and Node.js. Proficient in machine learning with a solid understanding of core concepts, algorithms, data handling, and tools like Python, Scikit-learn, and TensorFlow.
- **Proficiency in SQL:** Competent in database management, querying, and optimization.
